Bilateral Meetings

- Thursday (1:30pm - 6:00pm)
- Friday (9:00am - 12:00pm)

Description

Hittech Group BV is a Full Service System Supplier, that consists of a group of centrally controlled independent companies which operates as a system supplier, extended workplace and partner of OEM companies. The separate companies within Hittech Group create the flexibility of an independent enterprise, while a powerful synergy originates when the Hittech Group acts as one whole.

Hittech Group is a network organisation that really organises synergy through coordination groups. Flexibility combined with strong project management gives a strong dynamic group. At Hittech Group systems are developed or improved on the basis of your functional requirements according to clearly defined steps.

The group disposes of particular expertise in the field of precision movements, integrated controls and the integration of mechanics and electronics. Our 3D design tools immediately give a good impression of the design. Techniques such as FMEA, SPC, value engineering and re-design are also used by us for the improvement of systems or modules.

The speciality of Hittech Group is achieving practical affordable solutions and improving existing designs. Our developers and engineers are trained in production technologies so that they can develop the products in a more practical way. Our main markets are: Medical devices Micro-electronics and semi-conductors Laboratory and analysis equipment Packaging machines

Request

Cooperation with OEM companies active in Medical, Lab and Life Sciences

Hittech Group is a Full Service System Supplier that acts as a 1st tier supplier and partner of OEM companies.

Our most important competences are:

- Development, re-design and value-engineering of precision motion and optical systems

Assembly and testing of (sub)modules, devices, machines and systems.

- Precision machining of hard, soft and high-performance materials, galvanizing, anodizing and wetpainting.
- Casting of aluminum products in small to medium-sized series.
- Meltspinning of various (special) aluminium alloys.
- Services and maintenance of systems and machines and remanufacturing.
- Delivery of OEM products in particular for the packaging industry.
- 3D printing of metals (additive manufacturing).
- In addition we are expert in Projectmanagement and Supply chain management.

Our main markets are:

- Medical devices
- Micro-electronics and semi-conductors
- Laboratory and analysis equipment
- Packaging machines

This gives an unique combination of competences which are strengthening each other.

Via all these competences we are very well able to carrying out Total Life Time Management (TLTM) for our partners.

Cooperation Requested

1. Technical co-operation
2. Manufacturing agreement
3. Sales / Distribution

Offer
