- Friday (12:00pm - 4:00pm)

Description

Biofortuna's custom manufacturing and development service offers state of the art facilities and expertise for production and development of IVD kits. Services on offer include design, development, manufacturing, lyophilisation, filling and kitting. Biofortuna's lyophilisation service uses proprietary freeze-drying expertise to stabilise complete amplification reactions and immunoassays into instantly soluble pellets. Biofortuna are also developing qPCR solutions for comprehensive blood group genotyping.
