Bilateral Meetings

- Thursday (1:30pm - 6:00pm)
- Friday (9:00am - 12:00pm)

Description

An innovative Irish software company that combines Client Services, Product Development and Research into its daily activities. Founded in 2000 - they have successfully completed 100 technical projects. Over the last 10 year, the company has focused in on Medical Devices and Governance Risk and Compliance Projects.

Its client base ranges from global companies to software start-ups. The company also works with universities and institutes of technology on client projects or on potential research projects. The company can create bespoke solutions for its clients and it would be interested in a subcontracting type partnership.

While the company is small in size, they are agile, flexible and attentive to their customers' needs. They develop long-term relationships which can be relied on, particularly when projects relate directly to factory output and compliance. They use Microsoft .NET as an integration technology, along with Oracle and SQL Server databases.

Sectors worked in include Medical Devices (orthopaedics , neurovascular & spirometry), Manufacturing, Aviation, Mining, Banking, Financials, Local Government, Construction, Logistics, Utilities, Services, Marine and Retail.

The company is looking to partner with established companies within the medical device and IT Services areas and offer subcontracting services to them and possibly resell their products and services to the Med Tech and High Tech sectors in Ireland and potentially to the UK.

AREAS OF ACTIVITY

Electronics, Microelectronics

- Automation, Robotics Control Systems
- Embedded Systems and Real Time Systems
- Environmental and Biometrics Sensors, Actuators

Information Processing, Information System, Workflow Management

- Advanced Systems Architecture
- Artificial Intelligence (AI)

- **Computer Software**
- **Data Processing/Data Interchange, Middleware**
- **Data Protection, Storage Technology, Cryptography, Data Security**
- **Databases, Database Management, Data Mining**
- **Electronic Commerce, Electronic Payment**
- **Imaging, Image Processing, Pattern Recognition**
- **Information Technology/Informatics**
- **Internet Technologies/Communication (Wireless, Wi-Fi, Bluetooth)**
- **Knowledge Management, Process Management**
- **Simulation**
- **User Interfaces, Usability**
- **Electronic Signature**
- **Building Automation Software**
- **Smart Appliances**
- **HR-Software**
- **Internet of Things**
- **Environmental and Biometric Sensors, Actuators**
- **Cloud Technologies**

IT and Telematics Applications

- **Applications for Health**
- **Applications for Tourism**
- **ASP Application Service Providing**
- **Environment Management Systems & Documental Management Systems**
- **CRM - Customer relationship Management**
- **Quality Management System**
- **Maintenance Management System**
- **Operation Planning and Scheduler System**

- Analysis Risk Management
- Work Hygiene and Safety Management
- Serious Games
- ERP - Electronic Resources Planning

Other

- EU-funded collaborative research projects
- International Organisation / Project
