Bilateral Meetings

- Thursday (1:30pm - 6:00pm)
- Friday (9:00am - 12:00pm)

Description

Precognox is a software development firm specialized in intelligent, linguistic-based search, text mining and big data solutions. The founders of Precognox started to work for NIH (National Institutes of Health, USA) in 2001 by developing ToxSeek toxicological and other search engines, as well as miscellaneous language tools. Based on our experiences the company was founded in order to provide appropriate service for the increasing number of Hungarian and international customers at the highest standard.

Offer

Medical related software development

We have a pretty extensive experience in health related software development projects involving medical search, knowledge base development and text analytics.

We have been working with the National Institutes of Health for about 10 years to develop search and medical text mining applications, so we have experience with Pubmed, MeSH, UMLS and the medical domain in general.
