Offer

## R&D (Robotics, Mechatronics, Software)

Our engineering team consist of different disciplines. Software, electric-electronic, mechatronic and mechanical engineers are working together in different projects. When this team meets with our manufacturing capability there are little we can not do. We can adapt to engineering projects easily and create value.

Keywords: R&D Robotics Engineering

Cooperation Offered

1. Technical co-operation
2. License agreement
3. Manufacturing agreement
4. Other

Offer

## **Lean Manufacturing and Prototyping**

MEDSAV is a company that provides many different mechanical manufacturing techniques in house. We are able to manufacture complex prototypes accurately starting from the very first order and deliver them on time according to our customers' quality criteria.

Keywords: Prototyping    Lean Manufacturing  
Cooperation Offered

1. Technical co-operation
2. Manufacturing agreement

Request

## **Desktop Pipetting**

We have started to design simple and cost effective desktop type pipetting robot. We are looking for partners who can develop the system with us. We are open for new ideas and new strategies and new application processes.

Cooperation Requested

1. Investment/Financing
2. Sales / Distribution
3. License agreement
4. Technical co-operation

Request

## **Unit-Dose Drug Dispensing Systems (R&D)**

We are currently working on Unit-Dose Drug Dispensing Systems. We are looking for partners who can develop the system with us and also looking for markets which we can implement the system. We are open for new ideas and new strategies .

Cooperation Requested

1. Investment/Financing
2. Sales / Distribution
3. License agreement

4. Technical co-operation

5. Outsourcing co-operation
